Dear Paul,

Your empty envelope postmarked 752 zip, 31 July cancellation on both stamps, came today.

The flap is not sealed. I don't know if it had been or not. The adhesive still glistens.

The presence and nature of creases in the envelope seems to me to indicate that it was in the mails with some handling without contents.

I'm not experts in these things but I believe it is not impossible that the envelope missed sealing in the office and the rest just happened.

I'm sorry, of course, not to have the contents.

I'll keep the envelope the way it is. I showed it to my wife immediately.

It is a typed envelope, with "PERSONAL" added.

Best regards,

Harold Weisberg
